

Gina Brummet's Net Heart

1. Diagram showing the removal of the one line which caused the problem

2. Diagram for the heart as written & up to the point X where a problem occurred

3. One possible solution.

Netted Heart, Version 4 Gina Brummett

2 shuttles wound CTM both full size 20 thread

R = ring

Ch = chain

smr = small ring

sp = thread space

rw = reverse work

- = picot

+ = join

X = number of times to repeat []

Begin with Ring A:

R 6-3-3-6, rw

Ch 6-3-3-3-3, rw

R(B) 6-9 + middle p on RA, 9 - 6

R(C-F) [6 + p of prev r, 9-9-6] 4 X, rw

Ch 3 + p at opposite ch, 3-3-3-3-6, rw

RG 6 - 3 + middle p of RF, 3 - 6, rw

Ch 6 + last p RG

[Ch 3-3-3-3, + free p on next large R] 3 X

Ch 3-3-3-3, + p on RA

Ch 6, + base of RA, rw

RA & RG 6-3-3-6

RB-RF 6-9-9-6

R thrown off chain at bottom 8-8

All chains have 3 ds between p except

Chain segment at RA & RG

Working with one shuttle only, the small mignonette rings are made from here on. Drop ring shuttle and use the chain shuttle. Leave a small thread space. Most thread spaces will be approximately $\frac{3}{8}$ " but this one should be $\frac{1}{4}$ " or less.

[Smr 3, + next p on ch, 3, rw, sp ($\frac{3}{8}$ " until stated differently), smr 3-3, rw] repeat around (12 times total) to last p on ch, sp only $\frac{1}{4}$ " or far enough to + to base of RG, rw

Another sp ($\frac{1}{4}$ ") smr, sp ($\frac{1}{4}$ "), + smr from prev rnd (all joins are lock joins now)

[Sp ($\frac{3}{8}$ " again until stated differently) smr 3-3, sp, + next smr below] continue around to + in last smr, Sp ($\frac{1}{4}$ ") smr 3-3, sp ($\frac{1}{4}$ ") + to base of RA, rw

Using both shuttles now to chain. The ring shuttle is now the chain or ball thread & other is working shuttle.

Ch 3-3 + p of prev smr
 [Ch 3-3-3-3-3, + p of next smr] 5 X
 Ch 3-3-3-3-3, using ch shuttle, make r 8-8, return to using it as chain shuttle (this makes point at bottom of heart)
 [Ch 3-3-3-3-3, + next smr] 6 X
 Ch 3-3, + base of RG
 Finish off and hide ends

Ring A & G detail

Ch 6 segment

Small thread space,
all join in base of ring
