R5 4+4-4-4 RW

Ch 6 RW

R6 4+4-4-4 DNRW Lj (to next space above Lj on round 2) SLT #

Ra 17 X Lj to vsp on Round 2

Rb 17 X join to base of ring 2

\*Special note when you do this step make sure to maintain your direction of work. It's really easy for the rose to flip sides until you make the Lj at ring 6.

# instead of doing the Lj and SLT separately you can accomplish the same task by pulling up the ball thread and pass the shuttle through the loop as in a normal join.

Pull up the ball thread until it pops out the other side. This locks in the stitch and switches the threads at the same time. Don't do a 2nd 1/2 just go into the next stitch.
