abbreviations:

| | | |
|----------------------|--------------|--------|
| LR=large ring | R=r | ing |
| CH=chain | "-" | =picot |
| --"=long picot | cl r=close r | ing |
| rw=reverse work | p=picot | |
| prev r=previous ring | adj=adjacent | |

This pattern uses two shuttles. Shuttle#1 for the core thread and shuttle#2 for the chain thread and some rings. To make the rings that are in the middle of the heart sections, use sh#2 to make the rings appear on top of the chain, thus dropping sh#1 and grabbing sh#2. Then to resume making the chain in between the rings, pick up sh#1 as the core thread again.

Load two shuttles with thread and color of your choice.

Using shuttle#1:

LR, 2-2-2-2-2-2-2-2-2-2-2, cl r, rw

Using shuttle#2 as chain thread:

CH, 2-2--(long picot)3,

R#1, 1-1-1-1, cl r,

CH, 4,

R#2, 2+(to last p of prev r)2-2-2, cl r,

CH, 4,

CH2-(long picot)3,

Make same ring and chain combination as other side of heart,

except eliminate rings #4 and 10.

CH, 4--(long picot)2-2-(small picot)2+(shuttle join to the junction of ring #10 and adj ch)2, rw

SR, 4, cl r, rw

CH, 4+(to adj SR)2+(to next p)2+(to next p)3+(to middle p of

next adj r).

Continue chain as instructed from other side of heart with the

same number of picots in between the rings. After joining to

last small ring at the top,

CH, 2-2+(to adj long p)3

Tie and work in ends.
