Tatting Patterns & Shuttles

Revised by The Online Tatting Class 2022

theonlinetattingclass@gmail.com

On behalf of Georgia Seitz and The Online Tatting Class we would like to thank the many designers and tatters that have helped build the class library to what it is today. Without all those involved tatting would not be where it is today. Thank you for helping share the Art of Tatting.

The "Onion" Ring

Onion rings how-to

Using one shuttle, begin by tatting a normal ring with a picot at top center. Close ring and do not reverse work.

Using the same shuttle begin a second ring and tat up to the midpoint.

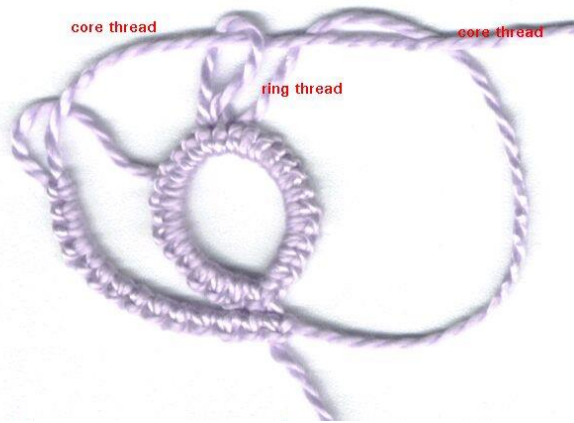

Next bring the **ring thread** up through the picot on the first ring.

the shuttle/core thread through the loop.

Bring

Pull gently on the ring thread to remove the excess thread. Make sure that the last double stitch formed touches the picot; adjust tension or compression as needed.

Finish tatting the ring and close allowing the new ring to surround the first ring.

The onion ring join makes it possible to create the look of a ring surrounded by a chain but using only one shuttle. If a second shuttle is introduced, then regular chain work can be accomplished and additional rings thrown off the chain using the second shuttle.

Basic diagram for an onion ring.

Additional shuttles can also bring in more color to the piece and the additional threads can be encapsulated in the chains, etc.
